Coding Resources

C++

Decimal Precision

```
// rounds up the decimal number
cout << setprecision(N) << n << endl;
// specify N fixed number of decimals
cout << fixed << setprecision(N) << n << endl;
```

IO Optimization

```
int main() {
    ios_base::sync_with_stdio(0);
    cin.tie(0);
}
```

Int To Binary

```
typedef long long int lli;
```

```
lli bitsInInt(lli n) {
    return floor(log2(n) + 1LL);
}
```

```
vector<int> intToBitsArray(lli n) {
    n = abs(n);
    if (!n) {
        vector<int> v;
        return v;
    }
    int length = bitsInInt(n);
    int lastPos = length - 1;
    vector<int> v(length);
    for (lli i = lastPos, j = 0; i > -1LL;
        i--, j++) {
        lli aux = (n >> i) & 1LL;
        v[j] = aux;
    }
    return v;
}
```

Map Value To Int

```
typedef string Key;
unordered_map<Key, int> val;
unordered_map<int, Key> getKey;
int mapId = 0;
```

```
int Map(Key key) {
    getKey[mapId] = key;
    return val.count(key) ? val[key]
        : val[key] = mapId++;
}
```

```
void initMapping() {
    mapId = 0;
    val.clear();
}
```

Permutations

```
typedef vector<int> T; // typedef string T;
vector<T> permutations(T v) {
    vector<vector<int>> ans;
    sort(v.begin(), v.end());
    do
        ans.push_back(v);
    while (next_permutation(v.begin(), v.end()));
    return ans;
}
```

Print Vector

```
void printv(vector<int> v) {
    if (v.size() == 0) {
        cout << "[]" << endl;
        return;
    }
    cout << "[" << v[0];
    for (int i = 1; i < v.size(); i++) {
        cout << ", " << v[i];
    }
    cout << "]" << endl;
}
```

Priority Queue Of Object

```
struct Object {
    char first;
    int second;
};

int main() {
    auto cmp = [](const Object& a,
                  const Object& b) {
        return a.second > b.second;
    };
    priority_queue<Object, vector<Object>,
                  decltype(cmp)>
        pq(cmp);
    vector<Object> v = {
        {'c', 3}, {'a', 1}, {'b', 2}};
    sort(v.begin(), v.end(), cmp);
    return 0;
}
```

Random

```
int random(int min, int max) {
    return min + rand() % (max - min + 1);
}

int main() {
    srand(time(0));
    // code
}
```

1.1.9 Read Line

```
// when reading lines, don't mix 'cin' with
// 'getline' just use getline and split
string input() {
    string ans;
    // cin >> ws; // eats all whitespaces.
    getline(cin, ans);
    return ans;
}
```

1.1.10 Sort Pair

```
pair<int, int> p;
sort(p.begin(), p.end());
// sorts array on the basis of the first element
```

1.1.11 Sort Vector Of Object

```
struct Object {
    char first;
    int second;
};

bool cmp(const Object& a, const Object& b) {
    return a.second > b.second;
}

int main() {
    vector<Object> v = {
        {'c', 3}, {'a', 1}, {'b', 2}};
    sort(v.begin(), v.end(), cmp);
    printv(v);
    return 0;
}
```

1.1.12 Split String

```
vector<string> split(string str, char token) {
    stringstream test(str);
    string seg;
    vector<string> seglist;
    while (getline(test, seg, token))
        seglist.push_back(seg);
    return seglist;
}
```

1.1.13 Typedef

```
typedef TYPE ALIAS
// e.g.
typedef int T;
```

1.2 Python

1.2.1 Combinations

```
import itertools
#from arr choose k = > combinations(arr, k)
print(list(itertools.combinations([1, 2, 3], 3)))
```

1.2.2 Fast IO

```
from sys import stdin, stdout

N = 10
#Reads N chars from stdin(it counts '\n' as char)
stdin.read(N)
#Reads until '\n' or EOF
line = stdin.readline()
#Reads all lines in stdin until EOF
lines = stdin.readlines()
#Writes a string to stdout, it doesn't add '\n'
stdout.write(line)
#Writes a list of strings to stdout
stdout.writelines(lines)
#Reads numbers separated by space in a line
numbers = list(map(int, stdin.readline().split()))
```

1.2.3 Permutations

```
import itertools
print(list(itertools.permutations([1, 2, 3])))
```

1.2.4 Random

```
import random
# Initialize the random number generator.
random.seed(None)
# Returns a random integer N such that a <= N <=
  ↳ b.
random.randint(a, b)
# Returns a random integer N such that 0 <= N < b
random.randrange(b)
# Returns a random integer N such that a <= N < b.
random.randrange(a, b)
# Returns and integer with k random bits.
random.getrandbits(k)
# shuffles a list
random.shuffle(li)
```

1.2.5 Sort List Of Object

```
class MyObject :
    def __init__(self, first, second, third):
        self.first = first
        self.second = second
        self.third = third

li = [MyObject('b', 3, 1), MyObject('a', 3, 2),
  ↳ MyObject('b', 3, 3)]
# returns list sorted by first then by second then
  ↳ by third in increasing order
ol = sorted(li, key = lambda x: (x.first,
  ↳ x.second, x.third), reverse=False)
# sorts inplace by first then by second then by
  ↳ third in increasing order
li.sort(key = lambda x: (x.first, x.second,
  ↳ x.third), reverse=False)
```

1.2.6 Sort List

```
li = ['a', 'c', 'b']
# sorts inplace in descending order
li.sort(reverse=True)
# returns sorted list ascending order
ol = sorted(li)
```

2 Data Structures

2.1 Graphs

2.1.1 UnionFind

```
struct UnionFind {
    vector<int> dad, size;
    int n;
    UnionFind(int N) : n(N), dad(N), size(N, 1) {
        while (--N) dad[N] = N;
    }

    int root(int u) {
        if (dad[u] == u) return u;
        return dad[u] = root(dad[u]);
    }

    bool areConnected(int u, int v) {
        return root(u) == root(v);
    }

    void join(int u, int v) {
        int Ru = root(u), Rv = root(v);
        if (Ru == Rv) return;
        --n, dad[Ru] = Rv;
        size[Rv] += size[Ru];
    }

    int getSize(int u) {
        return size[root(u)];
    }

    int numberOfSets() {
        return n;
    }
};
```

2.2 Ranges

2.2.1 BIT

2.2.2 Interval Tree

2.2.3 Segment Tree

```
// st = segment tree. st[1] = root;
// neutro = operation neutral value
// e.g. for sum is 0, for multiplication
```

// is 1, for gcd is 0, for min is INF, etc.

```
int MAXN = 500000, N;
