1 Coding Resources

1.1 C++

1.1.1 IOoptimizationCPP

```
int main() {
  ios_base::sync_with_stdio(0);
  cin.tie(0);
}
```

1.1.2 IntToBinary

```
typedef long long int lli;
lli bitsInInt(lli n) {
 return floor(log2(n) + 1LL);
vector<int> intToBitsArray(lli n) {
 n = abs(n);
  if (!n) {
   vector<int> v;
    return v;
  int length = bitsInInt(n);
  int lastPos = length - 1;
 vector<int> v(length);
  for (lli i = lastPos, j = 0; i > -1LL;
       i--, j++) {
   lli aux = (n \gg i) & 1LL;
   v[j] = aux;
 return v;
```

1.1.3 MapValueToInt

1.1.4 PrintVector

```
void printv(vector<int> v) {
  if (v.size() == 0) {
    cout << "[]" << endl;
    return;
}</pre>
```

```
cout << "[" << v[0];
for (int i = 1; i < v.size(); i++) {
   cout << ", " << v[i];
}
cout << "]" << endl;
}</pre>
```

1.1.5 PriorityQueueOfClass

```
struct Object {
  char first;
  int second;
};
int main() {
  auto cmp = [](const Object& a,
                const Object& b) {
    return a.second > b.second;
  priority_queue<Object, vector<Object>,
                 decltype(cmp)>
      pq(cmp);
  vector<Object> v = {
      {'c', 3}, {'a', 1}, {'b', 2}};
  sort(v.begin(), v.end(), cmp);
  return 0;
}
```

1.1.6 ReadLineCpp

```
// when reading lines, don't mix 'cin' with
// 'getline' just use getline and split
string input() {
   string ans;
   // cin >> ws; // eats all whitespaces.
   getline(cin, ans);
   return ans;
}
```

1.1.7 SortPair

```
pair<int, int> p;
sort(p.begin(), p.end());
// sorts array on the basis of the first element
```

1.1.8 SortVectorOfClass

```
struct Object {
  char first;
  int second;
};

bool cmp(const Object& a, const Object& b) {
  return a.second > b.second;
}

int main() {
  vector<Object> v = {
      {'c', 3}, {'a', 1}, {'b', 2}};
  sort(v.begin(), v.end(), cmp);
```

1.2 Python 2 DATA STRUCTURES

```
printv(v);
return 0;
}
```

1.1.9 SplitString

```
vector<string> split(string str, char token) {
   stringstream test(str);
   string seg;
   vector<string> seglist;
   while (getline(test, seg, token))
      seglist.push_back(seg);
   return seglist;
}
```

1.2 Python

1.2.1 Combinations

```
import itertools
#from arr choose k = > combinations(arr, k)
print(list(itertools.combinations([1, 2, 3], 3)))
```

1.2.2 Fast IO

```
from sys import stdin, stdout

N = 10

#Reads N chars from stdin(it counts '\n' as char)
stdin.read(N)

#Reads until '\n' or EOF
line = stdin.readline()

#Reads all lines in stdin until EOF
lines = stdin.readlines()

#Writes a string to stdout, it doesn 't adds '\n'
stdout.write(line)

#Writes a list of strings to stdout
stdout.writelines(lines)

#Reads numbers separated by space in a line
numbers = list(map(int, stdin.readline().split()))
```

1.2.3 Permutations

```
import itertools
print(list(itertools.permutations([1, 2, 3])))
```

1.2.4 SortListOfClass

2 Data Structures

2.1 SegmentTree

2.2 Trie

```
// ASIZE = alphabet size
// wpt = number of words passing through
// w = number of words ending in the node
// c = character
struct Trie {
  struct Node {
    // for lexicographical order use 'map'
    // map<char, Node *> ch;
    unordered_map<char, Node *> ch;
    int w = 0, wpt = 0;
  };
  Node *root = new Node();
  void insert(string str) {
    Node *curr = root;
    for (auto &c : str) {
